ring to run up  
inside body as  
shock cord  
mount  
(same as with  
2-Minute Egg  
shock cord  
attachment)

**Full size fin template**

The above models are designed for Eggloft Altitude. For Eggloft Duration, shrouded models like the 2-Minute Egg are preferred due to chute storage.

Both designs use three fins spaced 120° apart. Fins made from 1/32 plywood. Attach fins using cyanoacrylate to hold in place. Reinforce joint by multiple coats of Titebond to form fillets, or limited use of epoxy for fillets.  
(or thick CA if very careful)
